

## BIODIVERSITY POLICY

Suven Pharmaceutical Limited acknowledges the value of biodiversity conservation and management for both society and business. Through our performance, values, engagement, and communication, we promote the protection of biodiversity. We will work to identify and implement relevant initiatives inside our organisation, the full value chain, and with stakeholders. Suven places a high premium on biodiversity conservation and protection since it is essential to our mission of sustainable business.

### **Suven's Commitments on Biodiversity:**

- Committed to comply with all biodiversity-related country regulations.
- Devoting to preserving and safeguarding the biodiversity on the grounds of our facility and in the surrounding area.
- Aiming to apply the mitigation hierarchy, which involves preventing, minimizing, restoring, and, if required, offsetting any remaining impacts, especially if our operational area/plant is in proximity to sensitive biodiversity zones.
- Working hard to prevent deforestation on any of our sites and encouraging afforestation by planting more trees in the surrounding community and on our plant's property.
- Striving to collaborate with various stakeholders to secure the sustained conservation of native species in and around our operations.
- Raising awareness on conservation of biodiversity among local communities, employees, and stakeholders.
- Striving to reduce our overall environmental impact on biodiversity by actively implementing measures for climate change mitigation, minimizing pollution, and promoting the recycling of resources.
- Monitor, review, and assess the biodiversity performance against measurable biodiversity targets to drive continuous improvement, and openly communicate the results.
- This policy is communicated to all the stakeholders of our organisation for information, implementation, and review.

By adhering to these principles, we aim to not only meet but exceed biodiversity requirements, contributing to a more sustainable future for Suven and the communities we serve.
